DLK Pro Inspection Key

For fast, mobile checks

The DLK Pro Inspection Key is the ideal solution for quickly and easily checking driver and vehicle data for infringements and archiving it at the same time, as per legal requirements.

Digital tachograph data is downloaded via the serial 6-PIN interface, which is compatible with all digital tachographs. The integrated chip card reader enables data to be downloaded straight from the driver card. The high-speed USB interface then transfers the data quickly and securely to the computer.

The mobile Key in mobile phone format offers maximum comfort and easy handling, not least thanks to its integrated 2.2" TFT touch screen, which displays infringements on site, as per European legislation. The handy Key also provides information about the charge level of the rechargeable battery and memory capacity.

And the DLK Pro Inspection Key possesses outstanding data security, thanks to its integrated SD card reader – a backup copy can be created at any time on an external SD card.

Since the DLK Pro Inspection Key does not require a power supply for downloading tachograph data, or for transferring data to a PC, it is always ready for use in the vehicle and on the computer. The integrated rechargeable battery is only required for downloading driver card data and displaying data on the screen.

Using the associated software, driver activities, vehicle activities and infringements can then be visualised, archived and printed out at the PC.

The DLK Pro Inspection Key is ideal for small fleets and self-driving entrepreneurs where the monitoring of data for infringements is required, but without comprehensive evaluations.

DLK Pro Inspection Key

For fast, mobile checks

Advantages

- Complete system for mobile data download including the checking of infringements as per European legislation, Regulation (EC) No. 561/2006
- Fulfilment of the legal download obligation for fleet operators and workshops
- Fulfilment of the legal archiving obligation for vehicle fleets
- Downloading of mass memory and driver card data to all digital tachographs (compatible with 12V and 24V devices)
- Optional data download straight from the driver card via the integrated chip card reader
- Handy 2.2" TFT touch screen for displaying the last downloads, the download status, the charge level of the rechargeable battery and the currently available memory capacity
- Additional LED for displaying the download status, plus an acoustic signal when the download is complete
- Reminder for required downloads
- Signature checking of the download files
- Visualisation of the data, e.g. driver and vehicle activities (driving time, working time and rest periods), speed values, events, faults and infringement reports at the PC.
- No external power supply required for digital tachograph data downloads and evaluation at the PC
- Memory for around 6,000 quarterly downloads
- 2 GB memory
- Fast data transport from the digital tachograph to the PC thanks to the high-speed USB interface
- User-configurable start screen
- 29 languages available (Italian and Dutch must be registered)

Package contents

- DLKPro Inspection Key
- Comprehensive software for Key configuration, data visualisation, evaluation and archiving on the Key
- USB extension cable
- Quick Start Booklet (printed) and Operating Instructions (digital on the Key)
- Wrist loop

System requirements

- Windows 7, Windows Vista or Windows XP, with current service packs
- Free USB port on the PC

Accessories

- DLKPro Power Box
- DLKPro Neoprene Case
